Ranjitha Sathiaraj

Senior User Assistance Developer, SAP Asset Performance Management

linkedin.com/in/ranjitha-sathiaraj ranjithasathiarajs.github.io

Senior technical writer who treats documentation as a measurable product. I use analytics and support ticket data to find what customers cannot do, close the gaps, and build the trust architecture that enterprise AI documentation requires. Recent focus: documenting SAP APM's AI agents in Joule.

IMPACT AT A GLANCE

297	€6,475	+121%	17
tickets identified as deflectable	est. annual cost recovery	Q3 visit volume absorbed, tickets flat	section AI doc architecture built

SELECTED WORK

AI agent documentation architecture

Agentic AI

Built a 17-section documentation structure from scratch for SAP APM's Joule agents: responsible AI, scope and limitations, example prompts, and enterprise trust infrastructure. Now the reference for other APM agent docs.

Content effectiveness measurement

Data

Track Task Completion Rate, Self-Service Rate, and Helpful Sentiment quarterly. In Q3 2026, Help Portal visit volume doubled (48 to 106) while tickets held flat at 3, evidence that content scaled with demand.

Support ticket deflection via ISQM

TCO

Analysed SAP APM support tickets to surface recurring documentation gaps, identifying 297 additional deflectable tickets (≈€6,475/year) with a 50 to 70 hour rewrite scope. Built a custom Claude Code agent to automate support-tree content drafting.

Technical writing and UX review

Craft

Reviewed a 16-screen workflow against SAP Fiori guidelines (62 findings); audited system error messages against enterprise writing standards; shipped release docs including a 10-topic Consequence Assessments app from scratch.

CORE COMPETENCIES

- Content effectiveness analysis (TCR, SSR, ISQM)
- Topic-based and structured authoring
- Support ticket deflection strategy
- AI and agentic feature documentation
- RAG quality auditing and methodology
- Documentation from zero to shipped

TOOLS AND METHODS

Adobe Analytics · SAP Analytics Cloud (Task Completion Reporting, Self-Service Reporting) · ISQM · Confluence · SAP Help Portal · Claude Code (custom agents, dashboards, data pipelines) · SAP Fiori guidelines
